The Access to Medicines: Beyond Innovator Medicines event presents a unique opportunity to explore innovative solutions and foster a multi-stakeholder approach to ensure equitable access to essential medicines beyond innovator medicines. This year we aim to explore the multifaceted landscape of medicine access, looking beyond innovative medicines to others such as generics, and biosimilars.

Programme Highlights

- Gain deeper insights into the various factors that limit access to medicines in South Africa, from regulatory hurdles to pricing challenges.
- Get exposure to diverse perspectives from government and other stakeholders across the healthcare spectrum
- Stay informed on policy developments and network with other professionals for future potential synergies and collaboration
